PATENT

Amendments to the Specification:

Please replace paragraph [0015] with the following rewritten paragraph:

[0015] Relative to wide surface 24, an undercut portion 26 is formed on at least one side of transverse portion 14, and preferably on each, opposing side of transverse portion 14. Undercut portion has a width that is less than the width of wide portion 24. Thus, an undercut surface 28 is formed on a first face of transverse portion 14 and undercut surface 30 ~~if formed~~ is formed on an opposing second face of transverse portion 14. Frame transverse portion 14 also forms an inboard contact surface 32 within the inner edges of undercut contact surfaces 28 and 30.
